

MANAGEMENT FRIENDLY APPROACH

- We have put in maximum efforts to design an efficient program which is also management friendly.
- We guide already available teachers and help them extract the maximum output from the program through our guidance sessions.
- This is an economically favourable alternative for the management as they do not need to recruit additional faculty for the implementation of the program.
- At JS, we strongly believe in value driven education and thus our business model is not commercial but yet profitable.
- Amidst all the service providers, we offer a comparatively efficient and economically viable solution

ADVANTAGES OF STARTING EARLY

That's the biggest advantage of starting your prep from as early as Class 6. You can easily complete the most complex topics without any hassle, as compared to your competitors who would have started only a year back.

Time plays a huge factor in the journey of JEE / NEET preparation. By starting your prep from Class 6, you'll be giving yourself the best gift of time, that your competitors won't get Better Revision

Most aspirants hustle during the last one month or so to complete their revision. That's where starting early would come to your aid, and you'll be able to go through your revision without any rush.

SUGGESTIONS FOR ACADEMIC TEAM

- After every exam make question paper discussion immediately
- Make sure that Every student maintains Error Analysis book checking of Each student corrects the mistakes committed in the exam and should write the correct solution in the Error Analysis Book
- After every exam discuss Result Analysis with Teachers
- Try to take Parent's feedback & discuss with the Incharges.
- Discuss the Progress & difficulties faced by the students
